Rogério Henriques, Fidelidade's Chief Executive Officer, commented on the main highlights of 9M2024:

"Fidelidade's recent credit rating upgrade and last May's RT1 issuance are two events closely related to three key strategic priorities aimed at bolstering Fidelidade's return on equity: optimizing capital and improving solvency, strengthening profitability, and adjusting our investment portfolio asset allocation."

"The credit rating upgrade reflects clear progress in these areas. Specifically, Fitch's rationale for the upgrade highlighted improvements in Fidelidade's strategic asset allocation and increased solvency - boosted by the RT1 issuance - as key drivers of the rating change."

"At the same time, the upgrade contributes to developing a profitability-strengthening virtuous cycle. For example, it reinforces Fidelidade's efforts to become a key player in the savings and retirement market and allows for the optimization of the reinsurance programs of our international businesses."

"Our management team remains focused on executing additional strategic measures already identified to drive further capital efficiency and profitability for Fidelidade."

Gross Written Premiums

The year-to-date consolidated GWP reached 4,345M€, reflecting a 15.8% growth compared to the same period in 2023, driven by the expansion of Portuguese operations and the international Life business.

Consolidated Life GWP rose by 25.0% to €1,958M, supported by growth in both Portuguese and international operations. Continuing a year-long trend, The Prosperity Company's unit-linked business growth and a consolidated double-digit expansion of the foreign Life Risk business drove the YoY increase in Life International premiums (+15.2%). Portugal Life premiums recorded a 30.0% YoY growth, on the back of successful Life Financial commercial campaigns in bancassurance, fast-growing MyFidelidade App, and traditional agent network channels during 3Q2024.

Consolidated Non-Life premiums reached 2,386M€, a 9.2% YoY growth, on the back of a 12.9% increase in Portuguese operations, whose four main lines of business, Workers' Compensation, Health, Motor, and Fire and Other Damages, exhibited significant expansions due to continuing repricing efforts and organic market growth. International Non-Life GWP grew by 1.6%. Peru's

Non-Life GWP saw a slight decrease over the first nine months of the year, due to 5% declines in both the Motor and Health businesses, generated by underwriting discipline in the former case and pricing and condition adjustments in the latter. Additionally, currency depreciation impacted euro-denominated volumes in Angola and Chile. Despite the exchange rate effect, Chile (up 27.7% in euros) was the main driver behind the International Non-Life GWP growth.
